

Scrum in the Life of a Student

By: Amarrie Fowler, Juliana Arroyo, Zariyah Espinoza, and Selena Gutierrez

Scrum in the Life of a Student

- Scrum can be used: To organize daily life, school projects, homework and personal/social events and activities. For Example; By organizing and prioritizing the work that needs to be done in each class and setting a pace for the amount of time that each class will be worked on.

Values of SCRUM

COURAGE

Everyone on the team must have the courage to speak out to ensure the project moves in the right direction.

The ScrumMaster must have the courage to get people to stick to the Scrum framework. The ScrumMaster must also have the courage to not let anyone interfere in the work the team is doing during the Sprint.

OPENNESS

There should be transparency and trust among all the members of the team. The team should be open to feedback from the ScrumMaster, Product Owner, individual members of the Development Team, and from stakeholders.

RESPECT

Team members should respect everyone's ideas and the various viewpoints and perspectives. There should also be respect for other team members' diversities and backgrounds.

COMMITMENT

Team members must commit to the project and to the goals of every Sprint. Team members also must commit to each other to ensure that they succeed together in accomplishing their goals.

FOCUS

The team needs to stay focused on the goal of every Sprint. They must work together to focus on creating a product that has value to the organization and its stakeholders.

The 3 main Roles of Scrum

REVIEW

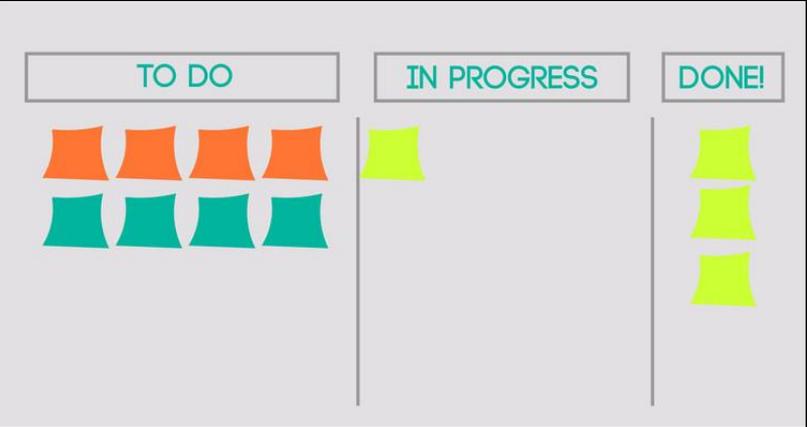

RETRO-SPECTIVE

SPRINT

Different of Scrum Boards

Zariyah's Scrum Experience

- I learned that scrum is good for use in a company or business like setting.
- With what I've learned I feel like scrum isn't exactly the best for a singular person; it is an organizational tool used for a group.
- I think that the way that scrum is set up it allows for bigger groups or groups in general to get a project done in the least amount of time.

Juliana's Scrum Experience

- In my Physical science class we use scrum to help us stay organized and get our labs and projects done on time.
- One of the most important parts of scrum is being able to trust and count on my team,
- Personally I am very forgetful and tend to get things done last minute. Having a scrum board that gives you a visual of what needs to be done and what already has been done is a big help.

Amarrie's Scrum experience

I have always been type of person to the point where I have to be doing something where it was homework to cleaning or playing sports. In a way I was super unorganized and everything was this big mess. When I moved here from california, I had no idea what Scrum was I thought it made no sense whatsoever, until I joined hope squad and then it made a whole lot of sense it helped me with keeping organized and help me manage my schedule completely.

This Week Schedule

- ❖ Monday
 - JAG leadership meeting at 12:05pm
- ❖ Tuesday
 - meeting was canceled so go to library to get some work done.
- ❖ Wednesday
 - cadet meeting deer valley (leave at 4:50pm)
